SUBJECT: STAFF USE OF PERSONAL/MOBILE TECHNOLOGY

All staff who use mobile technology in the course of their job duties, including but not limited to cell phones, smart phones, flash drives, tablets, e-readers, laptop computers, scanners, printers, digital cameras, camcorders, PDAs, iPads and IPods, shall abide by this Policy which governs the use of this type of equipment. Any device that runs software or systems including, but not limited to, Palm OS, Windows, Pocket PC, Android or IOS is considered a 'Computer" for the purposes of this Policy. In addition, all applicable language in Policy #6410 – Staff Use of Computerized Information Resources also applies to mobile and personal technology equipment when it is used in conjunction with the District's wireless network or in the course of the staff member's job duties.

Access to confidential data is a privilege afforded to District staff in the performance of their duties. Safeguarding this data is a District responsibility that the Board of Education takes very seriously. Consequently, District employment does not automatically guarantee the initial or ongoing ability to use mobile/personal devices to access the District's computer system (DCS hereafter) and the information contained therein.

Confidentiality and Private Information and Privacy Rights

Confidential and/or private data, including but not limited to, protected student records, employee personal identifying information, and District assessment data, shall only be loaded, stored or transferred to District-owned devices which are password protected. This restriction, designed to ensure data security, encompasses all computers and devices within the DCS, any mobile devices, including flash or key drives, and any devices that access the DCS from remote locations. Staff will not use email to transmit confidential files in order to work at home or another location. Staff will not use cloud-based storage services (such as Dropbox, GoogleDrive, SkyDrive, etc.) for confidential files.

Staff will not leave any devices unattended with confidential information visible. All devices are required to be locked down while the staff member steps away from the device, and settings enabled to freeze and lock after a set period of inactivity.

Staff data files and electronic storage areas shall remain District property, subject to District control and inspection. The District may access all such files and communications without prior notice to ensure system integrity and that users are complying with requirements of this policy and accompanying policies and regulations. Staff should **NOT** expect that information stored on the DCS will be private.

SUBJECT: STAFF USE OF PERSONAL/MOBILE TECHNOLOGY (Cont'd)

Personally Owned Devices

Staff may choose to use their own personal devices to perform job-related functions, rather than the technology assigned to them by the District. If a staff member chooses to use his/her own personal technology equipment, the following guidelines will apply:

1. The District may choose to maintain a list of approved mobile devices and related software applications and utilities. Devices not on the approved list may not connect to the DCS. If a staff member has a device he/she wishes to use and that device is not on the list, he/she must contact the Director of IT. The District reserves the right to update the list as needed.

2. All personal technology equipment used on the DCS network is subject to review by the District, or individuals/entities designed by the Superintendent, if there is reason to suspect that the personal device is causing a problem to the DCS network, or if the staff member is suspected by a supervisor of spending excessive time at work on non-work related matters.

3. No personal devices may be tethered to the district network via a network, USB, firewire, nor any other cable. Devices may only be attached to and authenticate through the district's wireless network.

4. Personal devices may not be used to establish a wireless ad-hoc or peer-to-peer network using his/her device while connected to the DCS. This includes, but is not limited to, using a personal device as a cabled or wireless hotspot.

5. Staff may not connect personal technology equipment to District owned projectors and/or SmartBoards. All connections must remain in a ready state for anyone that uses the room. Disconnecting HDMI cables, VGA cables, USB cables, network cables or any other cables from projector wall plates is prohibited.

6. Personal devices connected to the DCS network must have updated and secure operating systems, and their use will be segregated from District network resources.

7. The use of personal technology equipment in the course of a staff member's professional responsibilities may result in the equipment and/or certain data maintained on it being subject to review, production and/or disclosure (i.e. in response to a FOIL request, discovery demand or subpoena). The staff is required to submit any such information or equipment, when requested.

SUBJECT: STAFF USE OF PERSONAL/MOBILE TECHNOLOGY (Cont'd)

8. The entire cost to acquire all personal technology equipment is the responsibility of the staff member. Services that may incur a financial cost to the District, such as phone options or other 'apps" are not allowed. The District does not agree to pay such charges and staff who desire these options must assume all costs incurred for such charges.

9. Personal technology equipment is not covered by the District's insurance if it is lost, stolen or damaged. Loss or damage to any personal technology equipment is solely the responsibility of the staff member. If lost or stolen, the loss should be reported immediately to Technology staff so appropriate action can be taken to minimize any possible risk to the DCS and the District.

10. Staff assumes complete responsibility for the maintenance of personal devices, including maintenance to conform to District standards. Staff also assumes all responsibility for problem resolution, as well as the use and maintenance of functional, up-to-date anti-virus and anti-malware software and any other protections deemed necessary by Technology staff.

11. Connectivity and device operation issues are not supported by technical staff members; staff members should contact the device manufacturer or their carrier for operating system, network, or hardware-related issues. Staff members should take every precaution to prevent their personal data from being lost in the event the device is lost or stolen. It is the staff member's responsibility to take additional precautions, such as backing up email, contacts, etc.

12. Staff must also meet any expectations of continuity in formatting of files, etc. when making changes to documents for work purposes (i.e. do not change the format of a file so that the original file is unusable on District-owned hardware/software).

13. Staff use of a personal device is restricted to the individual and not to be shared or accessed by other students or users.

14. District-owned academic, instructional, or productivity software and apps shall not be installed on personal devices unless explicit permission is granted by the Director of IT. All applicable licensing requirements will be strictly enforced.

15. Use of any mobile technology device during the school day, whether District-issued or personally owned, should not interfere with the staff member's ability to carry out daily responsibilities.

SUBJECT: STAFF USE OF PERSONAL/MOBILE TECHNOLOGY (Cont'd)

District-Issued Devices

Mobile wireless devices issued by the District will be subject to audit and inventory standards. Staff must be able to produce the device when requested by a District official. If the device is lost or damaged, it must be reported to the staff member's supervisor immediately. If theft is suspected, law enforcement will be contacted.

Wireless Devices on District Premises

1. For security reasons, staff that uses their personal device to connect to the Internet, using a District network, will only be permitted to use the District's wireless network. Access to any other District network using a personal device is prohibited.

2. Personal devices that have the ability to offer wireless access to other devices must not be used to provide that functionality to others in any District building. The ability to connect personal devices to the district wireless network is a privilege and not a right for staff. Any staff member who violates the conditions of this policy using his/her own device will have his/her access privileges withdrawn.

3. When personal devices are used in District facilities or on the District wireless network, the District reserves the right to:

    a. Make determinations on whether specific uses of the personally owned wireless devices are consistent with the Staff Acceptable Use of Technology agreement;

    b. Log and monitor network usage; and

    c. Remove or restrict the user's access to the network and suspend the right to use the personally owned computer in District facilities at any time if it is determined that the user is engaged in unauthorized activity, violating the District's Staff Acceptable Use of Technology agreement, or violating the terms of this Policy.
