The fall Driver Education program is scheduled to begin on Saturday, September 24th, 2022. While Levittown staff provides the entirety of the classroom portion of the program, we have in previous years contracted with East Meadow Driving School to subsidize our driving component of the program. At this time, we are unable to renew East Meadow Driving School's contract due to their inability to provide us with evidence of appropriate insurance. The safety and security of our students is of the utmost importance and without the necessary insurance we do not feel comfortable moving forward with this arrangement. We have created schedules to ensure that all of our seniors are given priority for the fall program, but with this reduced capacity some of our juniors will have to wait for the spring 2023 program to participate. Eligible juniors who applied for the fall session, but were not accommodated, will be given priority for spring enrollment.

Please note that we are continuing to build our in-house program by training more Levittown staff members and budgeting for the purchase of more vehicles, so that we can service more students going forward without external partnerships.

We thank you for your understanding. Please know that the well-being of our students is always our number one priority.

Sincerely,

Dr. Beth Ziropiannis  
Assistant Superintendent for Curriculum & Instruction
