Levittown Public Schools – Mathematics Department  
Summer Readiness Resources (HS)

June 2021

Dear Parents/Guardians,

As we near the summer months, I am sure that all students are looking forward to enjoying some fun in the warm summer sun! In an effort to better prepare students for their next Regents-level mathematics course, the teachers of the mathematics department have created a set of instructional and practice resources for all high school students entering into either Algebra I, Geometry, or Algebra II in September.

The high school math teachers have worked collaboratively to identify specific prerequisite concepts that are paramount to student success in each respective course. For each of these prerequisite topics, students will be provided video tutorial resources, as well as practice problems, to review and reinforce these skills prior to the start of next year. Students can work throughout the summer at their own pace to complete the practice resources. Additionally, answer keys to the practice resources will be provided so that students can self-assess and self-correct their work. Access to these resources will begin on Monday, July 5 and will be available throughout the duration of the entire summer break.

*Please note that due to scheduled maintenance/updates, Google Classroom and access through Chromebooks will not be available from August 14 – August 25.*

Students can join the appropriate Google Classroom page to access the various resources using the class code, shown below:

- Algebra I – sprsjso
- Geometry – rrijjik
- Algebra II – 72ikpyu

Teachers of Algebra I, Geometry, and Algebra II will also be providing virtual “office hours” should any student need additional support as they work through these resources during the summer months. Schedules for the office hour sessions will be posted on the course Google Classroom page and all sessions will be conducted virtually via Google Meet.

While participation in completing these Summer Readiness resources is optional, it is **highly recommended** your child does so, as mastery of these prerequisite skills will provide a solid foundation for future content learning.

If you have any questions, please contact me at 516-434-7199 or email me at [jtowers@levittownschoos.com](mailto:jtowers@levittownschoos.com).

We look forward to providing this opportunity to support your child throughout the summer and to establish a foundation for success in mathematics during the 2021-2022 school year.

Thank you,

John Towers  
Director of Mathematics & Business
